Election/Restrictions

1. Applicant's election "of the embodiment of Figs. 1-6" in the reply filed on August 24, 2006 is hereby acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. However, upon reconsideration, the examiner finds the election/restriction requirement mailed on July 31, 2006 to have been based on an inadvertent misidentification of the disclosed and claimed species. Therefore, the election/restriction requirement mailed on July 31, 2006 is hereby withdrawn and replaced with the following corrected restriction requirement.
3. This application contains claims directed to the following patentably distinct species: the first species or the embodiment of Figures 2, 3, and 5; the second species or the embodiment of Figures 2, 4, and 6; the third species or the embodiment of Figure 7; and, the fourth species or the embodiment of Figures 8 and 9. The species are independent or distinct because the claims to the different species recite the mutually exclusive characteristics of each species corresponding to the respective detailed description of each species. In addition, these species are not obvious variants of each other based on the current record.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, or a single grouping of patentably indistinct species, for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

There is a search and/or examination burden for the patentably distinct species as set forth above because at least the following reason(s) apply: the species each require a different field (i.e., searching different classes/subclasses and employing different search strategies and queries).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or a grouping of patentably indistinct species to be examined even though the

Art Unit: 3744

requirement may be traversed (37 CFR 1.143) and **(ii) identification of the claims encompassing the elected species or grouping of patentably indistinct species**, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

The election may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traverse must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected species or grouping of patentably indistinct species.

Should applicant traverse on the ground that the species, or groupings of patentably indistinct species from which election is required, are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing them to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the species unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other species.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141.
